

Specification

Negative Ion Density	>1million/cc
Ozone Density	<0.05ppm
Working Voltage	DC12V
Input Power	1W
Related Humidity	RH20~80%
Operation Temperature	-20~60℃
Product Size	250×107 ×90 mm
Unit Weight	335g

Cautions

- This product is not intended for medical treatment or curing of disease. If you have a pacemaker, do not use this product.
- If you are currently being treated for a disease, please follow your doctor's instructions.
- Do not use directly near the ears or mucous membranes for the mouth or nose.
- If you feel uneasy during use, please discontinue use immediately.
- Supervise pets and children at all times.
- Do not immerse or get this product wet.
- A slight odor may be noticed when the product is on. This odor is not harmful in any way, and signifies normal workings of the ionizer.
- Please pull off the unit from the wall socket if no longer in use.

Ionic Air Purifier for Pet

Directions for use:
Please carefully read this before use :

Air outtake

Dust collector

Adaptor

Function

- Eliminate pet's odor
- Kill bacteria
- Prevent pet disease's cross-infection, keep your family and pet's healthy.
- Improve air quality wherever pets stay.
- Dust collection. Collects dust, pollens, pet dander, and cigarette smoke

HOW TO USE

1. Firmly plug the adaptor into wall socket, and connect the other with the unit's input port at the back.
2. Ion LED will become blue, the unit starts to release negative ion with breeze airflow output.
3. Please periodically use soft clean cloth or a mild detergent to clean dust collector based upon air clean rate.
4. Pull out the dust collector on the top after it's disconnected.

Features

- Patented, exclusive piezo-electric technology
- Advanced emitter ionization technology
- DC adaptor for power supply
